Agenda

Business Problem

Business Problem

- Direct flights to Athens, Greece are now extremely affordable from the U.S.
- Airbnb is looking to capitalize on this segment of travelers by:

Tasked With:

1. Optimize customer satisfaction for short-term rentals
2. Cost & Positive Rating analysis
3. Identify the best Property-Types to offer
4. Improve our Recommender System

Data Overview

Data Overview

- Analyzed nearly **19,000** unique Airbnb property listings located in Athens, Greece
- Data contained **descriptions, prices, host tenure, latitudes, longitudes, property types**, etc

Limitations

- No customer reviews (only datetimes of **first** and **last**)
- Incomplete **transit** proximity data
- Only Months are **February, March & April**
- **No customer sentiment** to explain host ratings

Solutions

- Created **7 new features** based on available data
- Strict cancellation policy, host tenure before 2016, good overall rating, average yearly ratings, is expensive, description word counts

BOTTOM LINE

Airbnb can reduce customer
dissatisfaction by nearly

90%

Most Expensive Listings By Neighborhood (%)

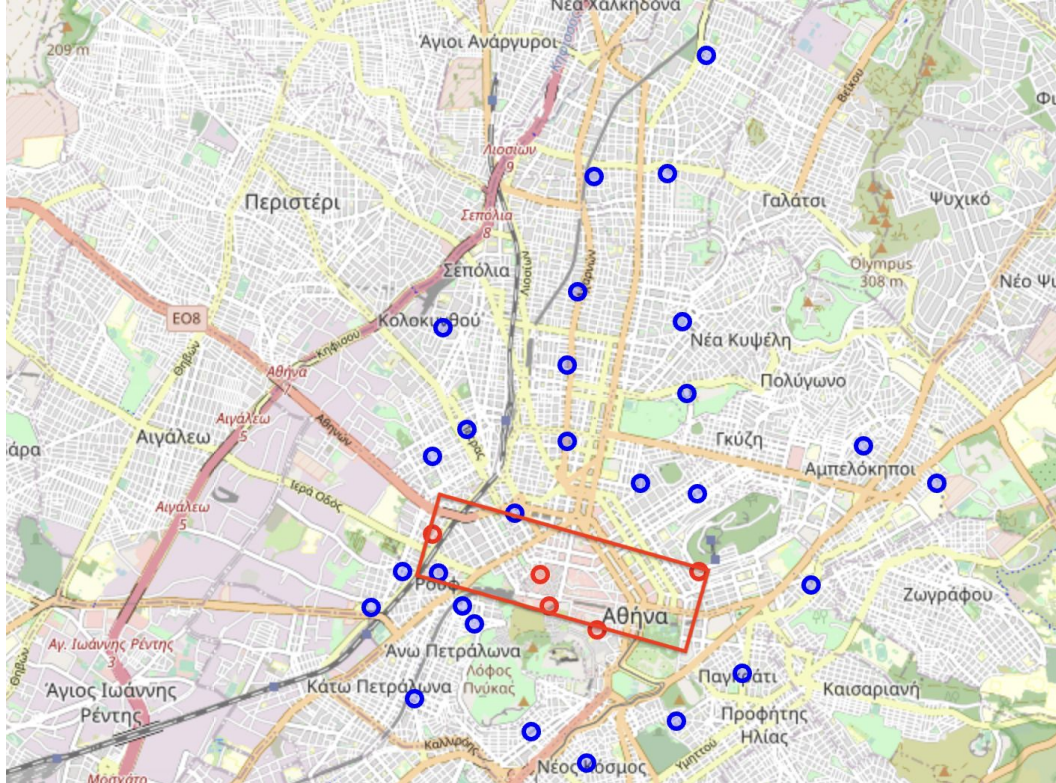

Neighborhoods with above 50% of their listings being categorized as "Expensive"

Least Expensive Listings By Neighborhood (%)

Neighborhoods with over 90% of their listings being categorized as “Not Expensive”

The further out from Downtown Athens, the less expensive the listing will be!

Expensive listings have 3% more 'good' ratings as compared to listings that are not expensive

Distribution of Ratings Across Various Property Types

Apartments represent the vast majority of low-rated property listings

Distribution of Description Word Count by Good Overall Rating

‘Good’ overall property ratings seem to have at least 150 words

Good vs. Not Good Ratings for Listings with **≥ 150 Words in Description**

Over 88% of listings with a description equal/above 150 words were rated 'Good'

Recommender System

Model will recommend the best properties to stay based on previously identified preferences

Recommendations

Recommendations

1.

Expensive
/
Not Expensive

2.

Avoid
Boosting
Apartments

3.

Promote
listings with
at least
155+ words
